

**INCAS**

Indonesian National Carbon Accounting System

The Indonesian National Carbon Accounting System (INCAS) is a national platform for greenhouse gas (GHG) accounting in the land-based sectors. It provides a systematic approach to Measurement, Reporting and Verification (MRV) of GHG emissions, including for REDD+ activities. For more information, please visit the INCAS website:

[www.incas-indonesia.org](http://www.incas-indonesia.org)

**The website features the following:**

- Current results in full detail and downloadable – nationally and for all 34 provinces
- INCAS methodologies and associated publications
- List of data inputs, definitions and assumptions
- Continuous improvement plan
- Latest news and information
- Contacts details and more.
